**First Interim Management Statement**

**Encouraging start to the year with Electronics orders up 42%**

Acal plc, a specialist provider of technology products and services across Europe and South Africa, is today issuing its first Interim Management Statement for the year ending 31 March 2011, which covers the period 1 April 2010 to date. This statement is being issued to the Group's Annual General Meeting which is being held today.

The Board is pleased to report that, since the Group's preliminary results announcement on 2 June 2010, trading has improved further with Group underlying\* sales for the first quarter increasing by around 20% year on year and orders, a measure of current demand, increasing by 29%.

The improvements are being driven by the Electronics division, which for the first quarter accounted for around 77% of Group sales, where underlying\* sales increased by around 26% and orders by 42% year on year. The integration of BFi Optilas is proceeding to plan and remains on track to be complete by the end of the financial year.

In the non-Electronics businesses, underlying\* sales for the quarter increased by 3% on the prior year and order levels were unchanged with margins continuing to be under pressure in the Supply Chain division.

There has been no significant change to the Group's financial position during the period.

There were no material events or transactions that impacted the Group during the period covered by this Interim Management Statement.

**Nick Jefferies, Group Chief Executive commented:**

“The year has started strongly, with orders and sales growth continuing to be robust. The increase in customer orders in the Electronics division, being 42% ahead of the prior year, is particularly encouraging.

We remain focused on tight operational management and the implementation of the BFi Optilas integration. Whilst we remain cautious as to the sustainability of the recovery into the second half, the Board remains confident that our specialisation strategy will continue to make good progress.”

*\*Underlying is at constant exchange rate, including acquisitions on a like for like basis and excluding a large customer contract in Supply Chain exited at the end of the previous financial year.*
